Overview

Core-CT will be upgrading the technical PeopleTools from version 8.49.xx to 8.51.13 on 04/02/2012 to ready the underlying technology infrastructure to facilitate the application upgrades to the all of the products contained in the Core-CT system. The application upgrades are planned for the latter part of 2012 and into 2013 to leverage the State of Connecticut investment in the Oracle/PeopleSoft ERP.

Agency Readiness Task 1-2 is to distribute documentation which highlights some of the features that will be available under PeopleTools 8.51 and the required actions to familiarize the users of the Core-CT system with the minor “look and feel” changes that the upgrade introduces. In addition to the updates to the look and feel of the Core-CT applications there are some functionality updates the 8.51.13 PeopleTools upgrade introduces as well. These updates are evolutionary as opposed to revolutionary and we have kept the new functional changes to a minimum to ensure that users are not adversely impacted with a large learning curve to transact with the system.

Action Required

Agency Liaisons will deploy the PeopleTools 8.51 upgrade documentation and send a confirmation email to their respective ARC acknowledging the distribution.
