Adding a Capitalized Asset Using Basic Add

Core-

Basic Add enables a user to manually add assets to the Asset Management module. Agencies acquire assets by escheatment, donation, lease, construction, or purchase. When an asset cannot be added through the procurement integration process, the asset must be entered using the Basic Add functionality.

In Core-CT 9.1 the capitalization status of an asset is determined by the **Capitalization Threshold ID** associated with the **Profile ID** and the total cost of the asset. If the total cost of the asset exceeds the capitalization threshold of \$999.99 and the **Profile ID** is associated with a threshold ID, Core-CT 9.1 will treat the asset as a capitalized asset. If the total cost of the asset does not exceed \$999.99 and a capitalization threshold is associated with the **Profile ID**, Core-CT 9.1 treats the asset as a non-capitalized asset.

If the **Profile ID** is not associated with a **Capitalization Threshold ID**, Core-CT 9.1 treats the asset as a capitalized asset no matter what the total cost of the asset.

In this topic a user adds an asset with a total cost of \$3000 and an **Asset Profile ID** associated with a **Capitalization Threshold ID**. Core-CT 9.1 treats the new asset as a capitalized asset.

This topic provides the minimum required information on how to add assets by using Basic Add.

sset Basic Information	
Eind an Existing Value Add a New Value	
usiness Unit:	
sset Identification: NEXT	
244	
nuu	
nd an Eviction Value Add a New Value	

Step	Action
2.	Enter AESM1 into the Business Unit field.

Step	Action
3.	Click in the Asset Identification field.
4.	By default Core-CT follows an auto numbering sequence for Asset Identifications. Once the asset is saved, the Asset Identification changes from NEXT to an auto assigned ID.
	Asset IDs can be assigned manually or automatically. Follow agency procedures.
	In this example enter 0001NEWCAP into the Asset Identification field.
5.	Click the Add button.

Step	Action
6.	Use the General Information page to add basic asset information or modify existing information.
7.	Enter COMPUTER into the Description field. The Short Desc field will automatically populate with the first 10 characters of the Description field.

Step	Action
8.	The Profile ID represents the depreciation method, the estimated life, and the depreciation rules for the asset.
	The Profile ID will also default the Category to the asset.
	Click the Look up Profile ID button.
9.	Click the 1EQUIPMENT link. 1EQUIPMENT
10.	The Threshold ID field automatically populated based on the value selected in the Profile ID field.
	Core-CT uses the Threshold ID to determine (based on the total cost of the asset) whether the asset will be treated as a capitalized or non-capitalized asset.
11.	Click the Location/Comments/Attributes tab.

Step	Action
33.	All assets in Core-CT 9.1 are potentially capitalizable.
	The Capitalization ID associated with the Asset Profile ID and the total cost of the asset determines whether an asset will be capitalized. Assets with total costs of less than \$1000 will be treated as non-capitalized assets if their Profile ID is associated with a Capitalization Threshold.
	If the Profile ID is not associated with a Capitalization Threshold, the asset will be treated as a capitalized asset no matter what its cost.
	Click the Capitalize button.
34.	Click the scrollbar.
35.	Click the Save button.
