

REQ Obligation captures the State of Connecticut's expected financial obligation for a requisition over a given period of time. When a requisition is approved and sourced, the obligation information automatically carries forward to the Purchase Order as the **PO Obligation**.

For **REQ** requisition types, requesters have the option to enter information manually or let Core-CT default values when the requisition is saved. The current date will default in the **Start Date**, the fiscal year end date in the **End Date**, and the total amount of the requisition in the **Total Obligation Amount**.

REQ Obligation works differently depending on the **CORE-10** type selected. Requesters are required to manually add values for **ITD-10** requisitions. Selecting **DAS-BID** requisitions will change the link to **Core-10 Attributes** as these requisitions source to contracts and do not require REQ Obligation information.

Entering the REQ Obligation

The following steps are for manual entry. No action is needed when allowing Core-CT to default values on non **ITD-10** requisitions.

Navigation: eProcurement > Create Requisition

Create Requisition

The screenshot shows the 'Create Requisition' form with three main steps: 1. Define Requisition, 2. Add Items and Services, and 3. Review and Submit. The 'Define Requisition' step is active. Below the steps, there are fields for Business Unit (AESM1), *Requester (JudyKing), Requisition Name, CORE-10 type (REQ), REQ Obligation link (highlighted with a red box and a mouse cursor), and Priority (Medium). A 'Line Defaults' section is expanded, showing 'Default Options' with 'Override' selected. Below this, there are fields for Vendor and Vendor Location.

The requester selects the **CORE-10** type and clicks the **REQ Obligation** link to display the REQ Obligation page.

The screenshot shows the REQ Obligation page with three input fields: Start Date, End Date, and Total Obligation Amount. Each date field has a calendar icon to its right. Below the fields are 'OK' and 'Cancel' buttons.

Start Date entry is required for the ITD-10, optional for all other requisition types. If left blank the current date defaults upon saving.

End Date entry is required for the ITD-10, optional for all other requisition types. If left blank the fiscal year end date defaults upon saving.

Total Obligation Amount entry is required for ITD-10, optional for all others. If left blank the total requisition dollar amount defaults upon saving.

Start Date	05/30/2012	
End Date	05/30/2013	
Total Obligation Amount	<input type="text" value="1000"/>	

The Obligation has a start and end date, but these dates may cross fiscal years and the obligations for future periods do not encumber funds.

Enter the **Start Date**, **End Date**, and **Total Obligation Amount**. Click **OK**.

The **REQ Obligation** link displays on the approvals page. Approvers can review and update the dates and amount as needed.

When copying an existing requisition to a new requisition the obligation information does not default. The requester has to update the obligation information as needed.

Reviewing the PO Obligation

The Purchase Order created during the sourcing process will reflect the obligation information entered. Users with PO review access click the **PO Obligation** link in the PO header to review the information.
