

Demand lines may fail to pass reservations processing for a number of reasons. At the end of the Reserve Materials process or the Fulfillment Requests process, the **Unreserved Demand Lines Report** (INS6400) can be generated to allow viewing of all demand lines that did not pass reservations processing.

**Navigation:** Main Menu > Inventory > Fulfill Stock Orders > Stock Requests > Reserve Materials Process

The report is produced at the end of the **Reserve Materials** process when the **Unreserved Demand Lines Report** check box is selected.

The screenshot shows the 'Reserve Materials' process configuration interface. At the top, there is a 'Run Control ID' field set to 'MaterialReservations' and a 'Run' button. Below this is a 'Process Request Parameters' section with various input fields and options. The 'Process Frequency' section has three radio buttons: 'Process Once', 'Always Process' (selected), and 'Don't Run'. The 'Request ID' is 'RESERVE' and the 'Description' is 'Reservations'. The 'Business Unit' is 'DOT88' and 'To Business Unit' is also 'DOT88'. The 'Reserve by Date' field is empty, and 'Date From' and 'Date To' are also empty. The 'Use Lead Days' is set to 'Use Fulfillment Lead Days'. The 'Demand Source' is 'Material Request' and 'Source Unit' is 'DOT88'. The 'Order Number', 'Schedule Line', 'Delivery ID', 'Route Group', 'Customer ID', 'Ship To Customer', 'Carrier ID', 'Parent Product ID', and 'Priority' fields are empty. The 'Auto Release Option' is 'Advance to Released' and 'Release Run Control' is 'OrderReleaseRequest'. At the bottom, the 'Unreserved Demand Lines Report' checkbox is checked and highlighted with a red box and a yellow starburst. Other options include 'Purge Report Table', 'Processing Options', and 'View Process Defaults'.

The report is generated whenever this process is run per this Run control and identifies demand lines that were not reserved for the following reasons:

- Demand line is not approved.
- Demand line is on hold.
- Demand line has one or more data integrity errors.
- Demand line is outside the reservation lead days.
- Demand line can only be reserved online using the Shortage Workbench.
- Demand line did not pass the line reservation rule.
- Demand line did not pass the order reservation rule.
- Demand line had no quantity reserved due to a reservation rule.
