

## Why use the Core-CT Enterprise Performance Management System (EPM) for your Ad-Hoc Reporting?

Data in EPM is designed specifically for Ad-Hoc reporting and is convenient because . . .

- Data is easier to find
- No technical background is required to use
- Queries require little to no joining of tables
- Query Tool enables easy downloads to Excel
- Mistakes can be made without repercussion

### Data is easier to find in EPM

*The table below represents the number of tables that make up all the data required for Ad Hoc Reporting by subject area in the Financial Production Environment vs. the EPM Environment:*

Financial Reporting Subject Areas	Production Environment Financial Tables	E P M Financial Tables
General Ledger	<b>17</b>	<b>1 - 4</b>
Purchasing	<b>43</b>	<b>1 - 6</b>
Accounts Payable	<b>36</b>	<b>1 - 7</b>
Accounts Receivable	<b>24</b>	<b>1 - 4</b>
FIN Configuration Information	<b>12</b>	<b>0*</b>

\*Chart of Account Data is built into Delivered EPM Reporting Tables.

*For more information on EPM Reporting Tables Content and Data, refer to the Data Dictionary or Web Learning Assistant in EPM.*
