

Kronos Scheduler: Employee Availability Guide V8.1 v2

Purpose

Part of the process of supporting employee work requests includes tracking employee availability. Kronos provides an opportunity for employee for communicate when they are open for extra shifts or prefer not to get more work hours. The Availability tool could be useful for:

- Creating schedule for an upcoming schedule period
- Staffing the current schedule period
- Managing employee availability status changes

An employee's availability to work at a given time can be represented at one of the five different statuses:

Indicator	Description
 Dark Green	Preferred time to work
 Green	Available to work
 Purple	Unavailable to work
 Pink	Prefers not to work (Preferred Time Off)
 White	Unknown whether the employee is available

There are two features to make availability entry and maintenance easier for the manager:

- Availability patterns that can apply to an employee, a department, or the organization as a whole
- Employee self service in which employees can maintain their own availability information
